All approvals, permits and clearances required for setting up of the Project including those required from State Government and local bodies shall be in the scope of the SPD. The Project to be selected under this RfS provides for deployment of PV Technology. However, the selection of Project would be technology agnostic within PV technology and crystalline silicon or thin film or CPV, with or without Trackers can be installed.

The SPD shall be required to follow the applicable rules regarding project registration with the State Nodal Agency in line with the provisions of the applicable policies/regulations of the State of Maharashtra. - (iv) In case the Bidder wishes to set up more than one Project, then the Projects would need to be physically identifiable for the Project Capacity with separate boundary wall, separate injection points and metering arrangement.

7 CONNECTIVITY WITH THE GRID

- 7.1 Refer Clause 4 of Section-VIII of the RfS.

8 POWER GENERATION BY SOLAR POWER DEVELOPER

8.1 CRITERIA FOR GENERATION

The SPD will declare the annual CUF of the Project at the time of submission of response to RfS, which shall be allowed to be modified at the time of signing of PPA. Thereafter, the CUF for the Project shall remain unchanged for the entire term of the PPA. The declared annual CUF shall in no case be less than 17%. SPD shall maintain generation so as to achieve annual CUF within + 10% and -15% of the declared value till the end of 10 years from COD, subject to the annual CUF remaining minimum of 15%, and within +10% and -20% of the declared value of the annual CUF thereafter till the end of the PPA duration of 25 years. The lower limit will, however, be relaxable by SECI to the extent of non-availability of grid for evacuation which is beyond the control of the SPD. The annual CUF will be calculated every year from 1st April of the year to 31st March next year.

8.2 SHORTFALL IN GENERATION

If for any Contract Year, it is found that the SPD has not been able to generate minimum energy corresponding to the value of annual CUF within the permissible lower limit of CUF declared by the SPD, on account of reasons solely attributable to the SPD, such shortfall in performance shall make the SPD liable to pay the compensation provided in the PSA (Power Sale Agreement) as payable by SECI to Buying Utility(ies)/ Discoms and shall duly pay such compensation to SECI to enable SECI to remit the amount to Buying Utility(ies)/ Discoms. This will, however, be relaxable by SECI to the extent of grid non-availability for evacuation which is beyond the control of the developer. This compensation shall be applied to the amount of shortfall in generation during the Contract Year. The amount of compensation shall be equal to the compensation payable (including RECs) by the buying utilities/ Discoms towards non - meeting of RPOs, if such compensation is ordered by the State Commission.

However, this compensation shall not be applicable in events of Force Majeure identified under the PPA with SECI, affecting supply of solar power by the SPD.

8.3 EXCESS GENERATION

Any excess generation over and above 10% of declared annual CUF will be purchased by SECI at a fixed tariff of 75% (seventy-five percent) of the PPA tariff, provided SECI is

<p>250MW (50MW x 5) GRID CONNECTED SOLAR PV POWER PROJECT AT DONDAICHA SOLAR PARK (PHASE - I)</p>	<p><u>RfS No. SECI/C&P/SPD/RfS/MH/082018</u></p>	<p><u>Page 23 of 122</u></p>	<p><u>Signature of Bidder</u></p>
---	--	------------------------------	-----------------------------------

able to get any buyer for sale of such excess generation. However, the SPD shall inform at least 60 days in advance of such excess generation to SECI, to enable SECI take necessary actions for sale of this excess generated energy. SECI shall be required to intimate its approval/refusal to the SPD, for buying such excess generation not later than 1 month of receiving the above offer from the SPD. In the event the offer of the SPD is not accepted by SECI within the said period of 1 month, such right shall cease to exist and the SPD, at its sole discretion, may sell such excess power to any third party.

While the SPD would be free to install DC solar field as per his design of required output, including his requirement of auxiliary consumption, he will not be allowed to sell any excess power to any other entity other than SECI (unless refused by SECI).

In case at any point of time, the peak of capacity reached is higher than the rated capacity and causes disturbance in the system at the point where power is injected, the SPD will have to forego the excess generation and reduce the output to the rated capacity to ensure compliance with grid requirement.

8.4 **OFFTAKE CONSTRAINTS DUE TO TRANSMISSION INFRASTRUCTURE/ GRID UNAVAILABILITY & BACKDOWN**

- a. **Generation Compensation in offtake constraint due to Transmission Infrastructure not complete/ ready (Transmission constraint):** After the scheduled commissioning date, if the Project is ready but the necessary power evacuation/ transmission infrastructure is not ready, for reasons not attributable to the Solar Power Developer, leading to offtake constraint, the provision for generation compensation is as follows.

Transmission Constraint	Provision for Generation Compensation
If the plant is ready but the necessary power evacuation/ transmission infrastructure is not ready, leading to offtake constraint.	<p>a. The normative CUF of 19% (Nineteen Percent) or committed CUF, whichever is lower, for the period of grid unavailability, shall be taken for the purpose of calculation of generation loss. Corresponding to this generation loss, the excess generation by the SPD in the succeeding 03 (Three) Contract Years, shall be procured by SECI at the PPA tariff so as to offset this loss.</p> <p>b. If the transmission delay is directly attributable to the organization building the transmission network and some penalty is imposed on him, then a part of that penalty may be utilized by SECI for compensating the generation loss.</p>

However, it is clarified that if the project is ready for commissioning prior to the Scheduled commissioning date, but the offtake is constrained because of inadequate/ incomplete power evacuation infrastructure, no compensation shall be permissible.

- b. **Generation Compensation in offtake constraint due to Grid Unavailability:** During the operation of the project, there can be some periods where the project can generate power but due to temporary transmission unavailability the power is not evacuated, for reasons not attributable to the Solar Power Developer. In such cases the generation compensation shall be addressed by SECI in following manner

Duration of Grid unavailability	Provision for Generation Compensation
Grid unavailability in a contract year as defined in the PPA: (only period from 8 am to 6 pm to be counted):	<p><i>Generation Loss = [(Average Generation per hour during the Contract Year) × (number of hours of grid unavailability during the Contract Year)]</i></p> <p>Where, Average Generation per hour during the Contract Year (kWh) = Total generation in the Contract Year (kWh) ÷ Total hours of generation in the Contract Year.</p> <p>The excess generation by the SPD equal to this generation loss shall be procured by SECI at the PPA tariff so as to offset this loss in the succeeding 3 (three) Contract Years.</p>

- c. **Offtake Constraints due to Backdown:** The Solar Power Developer and SECI shall follow the forecasting and scheduling process as per the regulations in this regard by the CERC. The Government of India, as per Clause 5.2(u) of the Indian Electricity Grid Code (IEGC), encourages a status of “must-run” to solar power projects. Accordingly, no solar power plant, duly commissioned, should be directed to back down by a Discom/ Load Dispatch Centre (LDC). In case such eventuality of Backdown arises, except for the cases where the Backdown is on account of events like consideration of grid security or safety of any equipment or personnel or other such conditions, the Solar Power Developer shall be eligible for a Minimum Generation Compensation, from SECI, in the manner detailed below.

Duration of Backdown	Provision for Generation Compensation
Hours of Backdown during a monthly billing cycle.	<p><i>Minimum Generation Compensation = 50% of [(Average Generation per hour during the month) × (number of backdown hours during the month)]X PPA Tariff</i></p> <p>Where, Average Generation per hour during the Contract Year (kWh) = Total generation in the Contract Year (kWh) ÷ Total hours of generation in the Contract Year.</p> <p>The excess generation by the SPD equal to this generation loss shall be procured by SECI at the</p>

	PPA tariff so as to offset this loss in the succeeding 3 (three) Contract Years.
--	--

The Generation Compensation is to be paid as part of the energy bill for the successive month after receipt of Regional Energy Accounts (REA)/SEA/JMR. No Trading Margin shall be applicable on this Generation Compensation provided under Clause 8.4 c above.

Note: Notwithstanding anything mentioned above, the provisions of Clause 8.4 of the RfS shall be applicable subject to the acceptance of the same by the respective Buying Utility in the Power Sale Agreement.

In case of delay in submission of documents beyond the 21 days as mentioned above, SECI shall not be liable for delay in verification of documents and subsequent delay in signing of PPA.

Irrespective of the date of signing of PPA, the Effective Date of the PPA shall be the date as on 30th day from the date of issuance of LOA. In extraordinary cases of unavoidable delays on the part of SECI in signing the PPAs, the Effective Date of the PPA shall then be the date of signing of PPA.

- 14.4 Back-to-back Power Sale Agreements (PSAs) will be executed by SECI with the State Buying Utility (DISCOM) for sale of solar power to it.
- 14.5 The SPDs will be free to reconfigure and repower the project from time to time during the PPA duration. However, SECI will be obliged to buy power only within the Capacity Utilization Factor (CUF) range laid down in Power Purchase Agreement (PPA) as per guidelines.

- (iii) In case of delay in achieving above condition as may be applicable, SECI shall encash Performance Bank Guarantees and shall remove the Project from the list of the selected Projects, unless the delay is on account of delay in allotment of land in Solar Park or by the Government not owing to any action or inaction on the part of the SPD, or caused due to Force Majeure as per PPA. An extension can however be considered, on the sole request of SPD, on advance payment of extension charges of INR 10,000/- per day per MW. This extension will not have an impact on the Scheduled Commissioning Date of the Project. Subsequent to the completion of deadline for achieving financial closure, SECI shall issue notices to the SPDs who are not meeting the requirements of Financial Closure as per the RfS deadlines. The notice shall provide a period of 7 business days to the respective SPDs to either furnish the necessary documents or make the above mentioned payment of INR 10,000/ MW/ day. In case of non-submission of either the requisite documents or the necessary amount upon expiry of the above-mentioned notice period of 7 days, SECI shall encash the PBG of the corresponding SPD and terminate the PPA for the corresponding Project. The amount of INR 10,000/ MW/ day shall be paid by the SPD in advance prior to the commencement of the said delay period and shall be calculated based on the period of delay as estimated by the SPD. In case of the SPD meeting the requirements of Financial Closure before the last date of such proposed delay period, the remaining amount deposited by the SPD shall be returned by SECI. Interest on account of delay in deposition of the above-mentioned charges or on any subsequent extension sought, shall be levied @ one year SBI MCLR rate/annum on pro-rata basis. Any extension charges paid so, shall be returned to the SPD without any interest on achievement of successful commissioning within the Scheduled Commissioning Date, on pro-rata basis, based on the project capacity commissioned as on Scheduled Commissioned Date.
- (iv) The SPD will have to submit the required documents to SECI at least 14 days prior to the scheduled Financial Closure date. In case of delay in submission of documents mentioned above, SECI shall not be liable for delay in verification of documents and subsequent delay in Financial Closure.

It shall be the sole responsibility of the Bidders to remove all the discrepancies and furnish additional

documents as requested. SECI shall not be responsible for rejection of any bid on account of the above.

- 2.a.4 The response to RfS submitted by the Bidder shall be scrutinized to establish Techno-Commercial eligibility as per RfS.

2.b SECOND ENVELOPE (FINANCIAL BID) EVALUATION (STEP - 2)

In this step evaluations of Techno-Commercially Qualified Bids shall be done based on the "First Round Tariff Bid" quoted by the bidders in the Electronic Form of Financial Bid. After this step, the shortlisted bidders shall be invited for the Reverse Auction.

- 2.b.1 Second Envelope (containing First Round Tariff) of only those bidders shall be opened whose technical bids are found to be qualified.
- 2.b.2 The Bidder including its Parent, Affiliate or Ultimate Parent or any Group Company will have to submit a single bid (single application) quoting a single tariff per kWh for all the Projects applied for. The tariff has to be quoted up to two places of decimal only. If it is quoted with more than two digits after decimal, it shall be ignored after first two decimal places. - 2.b.7 All Bidders with same tariff shall be eligible for reverse auction round (provided their rank is equal to or less than n^{th} Bidder as mentioned in Clause No. 3.2 of this Section-V.
- 2.b.8 Ranking of bidders after Financial Bid Evaluation: Following illustrates an example of ranking of bidders after financial bid opening and evaluation

Bidder	Submitted Financial Bid	Ranking
B1	₹ 2.10 (Tariff in ₹/ kWh)	L1
B2	₹ 2.20 (Tariff in ₹/ kWh)	L2
B3	₹ 2.30 (Tariff in ₹/ kWh)	L3
B4	₹ 2.30 (Tariff in ₹/ kWh)	L3
B5	₹ 2.43 (Tariff in ₹/ kWh)	L4
B6	₹ 2.60 (Tariff in ₹/ kWh)	L5
B7	₹ 2.70 (Tariff in ₹/ kWh)	L6
B8	₹ 2.80 (Tariff in ₹/ kWh)	L7
B9	₹ 2.93 (Tariff in ₹/ kWh)	L8

3 REVERSE AUCTION (STEP - 3)

- 3.1 The reverse auction for each project shall be conducted through www.tcil-india-electronicstender.com portal on the day as intimated by SECI to the eligible bidders.
- 3.2 The Total eligible bidders for the Project for reverse auction shall be decided as mentioned below:

Assuming

T = Total Techno-Commercially Qualified Bidders, and

Sk = Cumulative capacity till the 'k'th serial number bidder (**not the 'k'th rank bidder**) after ranking is done in ascending order from L1 onwards

$S_E =$ (Eligible capacity for award)	(i) In case $50 \leq S_T \leq 250$ MW, $S_E = S_T - 50$ MW (ii) In case $S_T > 250$ MW, $S_E = 250$ MW	
$n = \{$	2, if $T=2$	
	$m + (T-m)/2$, if $S_m \geq S_E$ and $T-m$ is even, if $T \geq 3$	Where m = Total number of techno-commercially qualified bidders (after ranking is done in ascending order from L1 onwards) such that ($S_{m-1} < S_E$ and $S_m \geq S_E$) and $1 \leq m \leq T$
	$m + ((T-m+1)/2)$, if $S_m \geq S_E$ and $T-m$ is odd if $T \geq 3$	

Total eligible Bidders for e-Reverse Auction = Bidders from Sl. No. 1 to Sl. No. n.
For e.g. (Shortlisting of Bidders for reverse auction):

Total bid capacity of techno-commercially shortlisted bidders = $S_T = 350$ MW

Sl. No.	Techno commercially qualified Bidder	Rank	Capacity (MW)	T	m	S_E	n	Shortlisted Bidders
1	B3	L1	50	5	2	2000 MW	4*	B3
2	B5	L2	100					B5
3	B1	L3	100					B1
4	B4	L3	50					B4
5	B2	L4	50					B2

* $n = 2 + (5-2+1)/2 = 4$

- 3.3 At least one week prior to reverse auction, an advance intimation regarding the date and time of the reverse auction will be sent by e-mail to all the bidders whose technical bids have been opened and found to be qualified. However, from this advance intimation it shall not be construed by the bidders that they have been shortlisted for Reverse Auction. Further at least two hours before the schedule start time of Reverse Auction, a system generated email for invitation for Reverse Auction will be sent to all those bidders only who have been shortlisted based on the criteria mentioned at Clause No. 3.2 of this Section-V.
- 3.4 Shortlisted bidders for Reverse Auction will be able to login into the TCIL website of reverse auction 15 minutes before the start time of reverse auction.
- 3.4.1 During the 15 minutes prior to start of reverse auction process, the respective tariff of the bidder shall be displayed on its window.

- 3.4.2 The minimum decrement value for tariff shall be INR 0.01 per kWh. The Bidder can mention its revised discounted tariff which has to be at least 01 (One) Paisa less than its current tariff.
- 3.4.3 Bidders can only quote any value lower than their previous quoted tariff taking into consideration the minimum decrement value mentioned in the previous clause. However, at any stage, increase in tariff will not be permissible. Bidders can improve their ranking by quoting the tariff lower than their last quoted tariff.
- 3.4.4 During reverse auction, the Bidder shall not have the option of changing the total project capacity while quoting tariff during reverse auction.
- 3.4.5 In the bidder's bidding window, the following information can be viewed by the bidder:
- Its tariff as the initial start price and there after last quoted tariff along with the project capacity for which the Bidder is qualified.
 - The list of all the Bidders with their following details: Pseudo Identity, last quoted tariff and project capacity
- 3.4.6 The initial auction period will be of 30 (thirty) minutes with a provision of auto extension by 08 (eight) minutes from the scheduled/ extended closing time. Such auto extension shall be effected if by way of reduction in tariff, a Bidder causes a change in its zonal placement at that instant. The 'zones' are as follows:
- Green Zone: This zone consists of the Bidders who may be allocated their full quoted Project capacity if the auction is closed at that instance.
 - Yellow Zone: This zone consists of the Bidders who may be allocated a part of their full quoted Project capacity if the auction is closed at that instance.
 - Red Zone: This zone consists of the Bidders who will not be awarded their quoted Project capacity if the auction is closed at that instance.

If no such change as described above is effected during the last 5 minutes of auction period or extended auction period, then the reverse auction process will automatically get closed.

4 **SELECTION OF SUCCESSFUL BIDDERS**

- 4.1 The bidders shall be selected in the ascending order with lowest quoted tariff (being L1) and so on till the capacity is exhausted. **In case of a tie among two or more bidders (i.e. their last quoted tariff being the same at the end of the e-RA), they will be considered in the chronological order of their last bid with preference to that bidder who has quoted his last bid earlier than others.**

--	---	-----------------------	----------------------------

In the above case, if the time of quote also become exactly same among the bidders at a tie, then the ranking among these bidders shall be done as follows:

Step 1: Lowest rank will be given to the bidder who has quoted the lowest in Financial Bid (Electronic Form) and so on. If there is also a tie among any of these bidders, then the following step (Step 2) will be followed.

Step 2: Ranking will be done based on draw of lots.

- 4.2 At the end of selection process, a Letter of Award (LOA) will be issued to the successful Bidders for each Project. In case of a Consortium being selected as the successful Bidder, the LOA shall be issued to the Lead Member of the Consortium.

In all cases, SECI's decision regarding selection of Bidder through Reverse Auction or other- wise based on tariff or annulment of tender process shall be final and binding on all participating bidders.

It is proposed to develop the Administrative cum Residential Building including Conference Hall for the employee working in Solar Project.

4.5 WEATHER MONITORING STATION (WMS)

One No. of Weather Monitoring Station (WMS) shall be developed for monitoring rainfall, solar radiation, wind speed, atmospheric pressure, temperature and other necessary parameters on real-time basis. This Weather Monitoring System should be SCADA compatible & work in line with Sub-station SCADA System.

4.6 CONSTRUCTION POWER

From the beginning of construction of solar park, interim power arrangement needs to be made. The power will be tapped from Vikharan Sub-station available at nearby site and will be made available at a nodal point within the park premises for use during construction of park, infrastructure development & housing of staff. Tapping of construction power from nodal point shall be the responsibility of SPD. This power will be used till the completion of individual 50 MW units on chargeable basis. Once each block of 50 MW is ready for generation of power, the construction power will be withdrawn and power arrangement will be responsibility of SPD.

4.7 WATER RESOURCE

As per the present level of study there is no identified water source nearby which can be used for cleaning of solar module. Hence, underground water is considered for cleaning of solar module and other necessary requirement of Solar Park. During construction phase it is responsibility of the SPD to arrange water supply through its own resources. However, if any necessary permit is required for water supply, MAHAGENCO will provide necessary support.

4.8 ROAD NETWORK

The road network has been planned and designed to provide conflict free traffic movement and controlled vehicular entry. All the plots have access to these roads. The road network for the park is divided into two types of categories such as;

- Main Approach Road
- Peripheral Road

The Approach roads would follow the grid-iron pattern and will connect to all the proposed solar blocks of the project.

4.9 GREENBELT DEVELOPMENT

It is proposed to develop green belt around the periphery of various project appurtenances, project colony, etc. The purpose of Greenbelt around the project site is to capture the fugitive emissions, attenuate the noise pollution generated and improve the aesthetics.

The proposed green belt at the project site will form an effective barrier between the plant and the surroundings. Open spaces, where tree plantation may not be possible, will be covered with shrubs and grass to prevent erosion of topsoil. Adequate attention shall be paid to plantation of trees, their maintenance and protection based on the geology, soil condition and topography of the site area.

DETAILS OF SOLAR PARK

1 SOLAR PARK SCHEME

The provisions of Solar Park Scheme notified by the Ministry of New & Renewable Energy vide No.30/26/2014-15/NSM dated 12th December, 2014 as amended from time to time, would be applicable for the solar project to be set up in the Solar Park.

2 SOLAR PARK IMPLEMENTING AGENCY (SPIA)

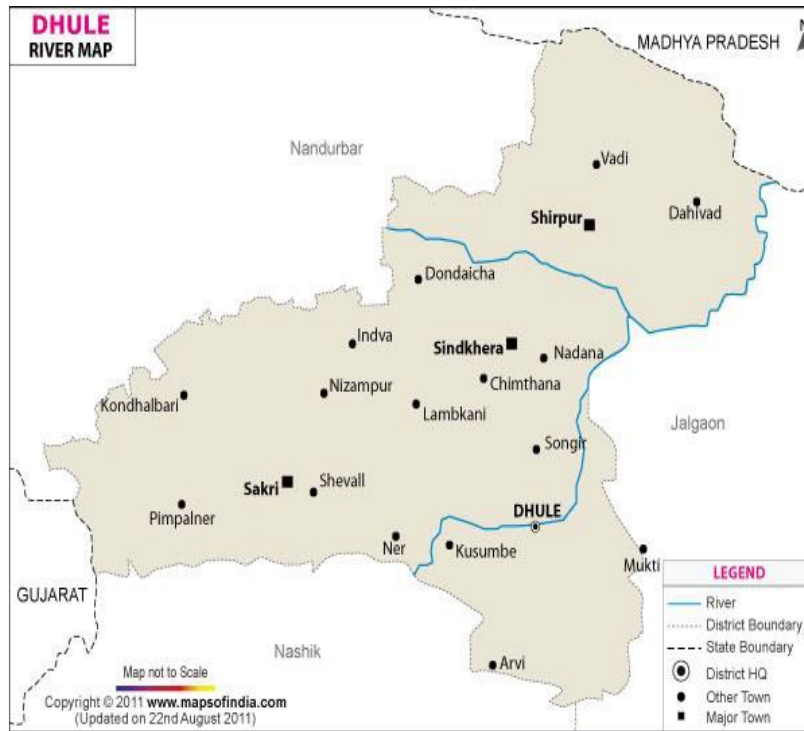

- 2.1 The Solar PV Project to be selected by SECI under this RfS is to be developed inside the Solar Park which is developed by Solar Park Implementing Agency (SPIA).
- 2.2 Maharashtra State Power Generation Company Limited (MAHAGENCO) is the SPIA for this Solar Park. The SPD after issuance of LoA, will have to approach the SPIA to carry out execution of the SPIA agreement, allotment of land, timelines for availability, possession and connectivity for the projects/plots. The contact details of the concerned SPIA are as follows:

Name and address of the SPIA	Maharashtra State Power Generation Company Ltd., PRAKASHGAD Plot No. G-9, Bandra (East) Mumbai - 400 051
Details of the Contact Person for the SPIA	Sh. R. B. Gohane Chief Engineer (Solar-Project) Contact No.: +91 22 26474211/ 26472131 (Extn. 2452/ 2448) Email: dycespqgd@mahagenco.in , cesolarproj@gmail.com
Website of SPIA	www.mahagenco.in

3 LOCATION OF THE SOLAR PARK

The proposed Solar Park is located near Dondaicha Town, Dhule District of Maharashtra. The project is located at GPS co-ordinates of Latitude 21.27600N and Longitude of 74.61440E. The area is located parallel to State Highway-1. The location map is shown at Figure-1. Only one proper road is available to access the area, remaining all are mud road/ cart road. The nearest railway station is Dondaicha and nearest Airport with road connectivity is Nasik Gandhi Nagar Airport which is 200 KM from Site and it is about 340 KM from Chhatrapati Shivaji International Airport, Mumbai. For Phase- I (250 MW) Solar Park, 505.85 Ha land is required out of which 408 Hectare land is under possession of Mahagenco and balance 97 Ha land will be acquired by August 2018 so that continuous patch of land can be allocated to SPD's.

Clear Demarcation of individual plots will be carried out by MAHAGENCO.

4 **CONNECTIVITY IN SOLAR PARK**

Solar generation from each project (having capacity of 50MW) will be converted from DC voltage to 415V AC voltages by appropriate inverter topologies. The output from the inverters will then be stepped up to 33kV using 0.415/33kV transformers of suitable rating(s) and injected to a common 33/220kV GIS pooling station through cable. GIS is proposed considering technical merits, reduced space, compact design & reliability. The SPD shall have to connect to 33kV bus of 220/33kV Pooling Sub-station by 33kV cables at its own cost.

Total 250MW Power will be evacuated through 220kV multi circuit line from 33/220kV

---	---	-----------------------	----------------------------

GIS main pooling station through LILO arrangement on 220kV Dondaicha - Dhule S/C & Dondaicha - Amalner - Dhule S/C lines. In order to take care of power evacuation from the Solar park and to avoid any intermediate evacuation constraint, MSETCL have inter-alia planned the following interim 220kV system during the initial stages of solar park development, keeping in view of the delay in commissioning of their 400/220kV Balsane GIS sub-station.

Interim 220kV System

- LILO of 220kV Dondaicha - Dhule S/C and 220kV Dondaicha - Amalner - Dhule S/C at 220kV Pooling Sub-Station at Solar Park Site, by erecting M/C towers from LILO point.
- After scrutiny through Load Flow Studies, it is observed that due to existing generations in Sakri & Dondaicha area, evacuation of 250MW out of 500MW generation is possible through an interim arrangement without any contingencies.
- The External Power Evacuation is not included in Phase - I development of Solar Park as the interim connectivity will be made available through LILO arrangement.

Timelines for Phase-I (250 MW) Solar Park are as follows

Sr. No.	Activities	Duration
1.	Interim Arrangement (LILO) for Evacuation of 250 MW	12 Months
2.	Power Pooling Substation 220/33kV (LoA is ready to M/s. Sterling & Wilson Pvt.Ltd.)	18 Monts

- 4.1 The Dondaicha solar park is envisaged to be developed under two phases with the first phase designed for 250MW (5 x 50MW) capacity. In Phase-I, there will be 5 Blocks namely Block-1, Block-2, Block-3, Block-4 and Block-5. Various Solar Power Developers (SPDs) and individual developer will be entrusted to develop 50MW project under each block in the Park. The scope and configuration of PV modules, PV strings, solar panels, inverters, step- up transformers and associated 33kV interconnections will be under the scope of the bidders. However, it may be subject to detailed evaluation and modification during the pre-bidding processes. The projects under Phase-I of the Solar Park will be commissioned by 2019-20.

Solar generation from each project will be converted from DC voltage to 415V AC Voltage by appropriate inverter topologies. The output generation from the inverters will then be stepped up to 33kV using suitable 0.415/33kV transformers for evacuation.

The generation from each power project under Phase-I (250MW) is proposed to be injected to a 33/220kV pooling station of MSPGCL to be set up within the premises of the solar park for further transmission to the State grid. MSETCL has affirmed a 220kV interim arrangement (illustrated below) for power evacuation for phase-I (250 MW) of solar park development.

4.2 Internal Power Evacuation Arrangement under Phase-I (5 x 50MW)

Solar generation from each project will be converted from DC voltage to 415V AC voltages by appropriate inverter topologies (under the scope of the developers). The

output from the inverters will then be stepped up to 33kV using 0.415/33kV transformers of suitable rating(s) and injected to 33/220kV GIS pooling station.

MSPGCL has contemplated to establish the 33/220kV GIS pooling station in the south-western part of the Solar Park. This pooling sub-station will be established by MSETCL on behalf of MSPGCL and the land required for the same is provided by MSPGCL. This 220kV pooling station will be operated and maintained by MSPGCL after handing over by MSETCL.

As an interim arrangement for power evacuation from the proposed 33/220kV pooling station, 220kV evacuation system evolved by MSETCL and explained in the subsequent section will be developed matching with the time frame of Phase-I project for transfer of power to the State's grid. The proposed interim arrangement for evacuation from solar power park will not be delinked or removed even after the establishment & commissioning of 400/220kV Balsane Sub-Station, as same interim arrangement will continue to be a permanent arrangement as part of the 400/220kV Balsane Sub-Station Scheme. As such there will be no delinking & subsequent outage required. The evacuation of power from solar park will remain unaffected during commissioning of 400kV Balsane Sub-Station.

The internal power evacuation arrangement will be comprising of 33kV XLPE cables commencing from 33kV bus of each solar project to the common 33/220kV GIS pooling station. Each of the solar projects (50 MW each) will have the adequate provision of 33kV outgoing bays to inject its generation to the 33/220kV pooling station of the solar park.

The requirements of various components at this sub-station such as 33kV GIS buses, 220kV GIS buses, 33/220kV 100 MVA transformers, XLPE cables etc. have been included with the following major provisions:

- I. Establishment of 220/33kV Pooling Sub-Station at Solar Park Site
- II. 3x100 MVA, 220/33kV transformer at 220kV Pooling Sub-Station with 220kV and 33kV GIS bays. It includes a provision of one spare transformer to meet contingency.
- III. 33kV bays at 220/33kV pooling Sub-Station: 12 Nos
- IV. 220kV bays at 220/33kV pooling Sub-Station (including outgoing line bays): 08 Nos. along with a space provision for 02 nos. GIS line bays for future expansion relating to interconnection with the Pooling Station-2 under Phase-II of the Solar Park.
- V. 220 kV M/C interconnecting lines with the proposed 400/220kV Sub-Station at Balsane (under the scope of MSETCL).
- VI. 1 x 315kVA 33/0.415kV Transformers and associated bays for the auxiliary supply.

--	---	-------------------------------------	--

VII. Provision for suitable ABT metering arrangements for measuring Four Quadrant Reactive Energy at 220/33kV Pooling Station and at 400/220kV Balsane Sub-Station.

VIII. Provision of SCADA/ RTU for visibility of Solar park generation as a whole to SLDC for real time monitoring (as per the requirements of SLDC).

IX. Construction of internal 33kV feeders/ XLPE cables for inter-connecting solar generations of individual solar projects to the 33/220kV Pooling Station.

4.3 **Auxiliary Power Supply**

Regarding arrangement for auxiliary supply at 415V in the solar park, it is proposed to draw power from the 33kV bus of the main 33/220kV pooling station by 1x315kVA, 0.415/33kV transformers.

4.4 **External Power Evacuation Arrangement for Phase-I Projects (5 x 50MW) in the Solar Park**

The time line for commissioning of the Phase-I projects of the solar Park will be 2019-20. MSETCL has planned the evacuation arrangements that cover the interim transmission system applicable for Phase-I projects and final 400kV evacuation plan as following:

4.4.1 **220kV Interim Arrangement for Phase-I Power Evacuation**

In order to take care of power evacuation from the Solar Park and to avoid any intermediate evacuation constraint, MSETCL have inter-alia planned the following interim 220kV system during the initial stages of solar park development, keeping in view of the delay in commissioning of their 400/220kV Balsane GIS Sub-Station.

Interim 220kV System

- (I) LILO of 220 kV Dondaicha - Dhule S/C and 220kV Dondaicha - Amalner - Dhule S/C at 220kV Pooling Sub-Station at Solar Park Site, by erecting M/C towers from LILO point.
- (II) After scrutiny through Load Flow Studies, it is observed that due to existing generations in Sakri & Dondaicha area, evacuation of 250MW out of 500MW generation is possible through an interim arrangement without any contingencies. Hence, till commission of the 400kV Poling Sub-Station at Balsane with allied Scope of Works, the generation will have to be restricted to 250MW.

<p>250MW (50MW x 5) GRID CONNECTED SOLAR PV POWER PROJECT AT DONDAICHA SOLAR PARK (PHASE - I)</p>	<p><u>RfS No. SECI/C&P/SPD/RfS/MH/082018</u></p>	<p><u>Page 95 of 122</u></p>	<p><u>Signature of Bidder</u></p>
---	--	------------------------------	-----------------------------------

- (III) The External Power Evacuation cost is not included in Phase-I Development of Solar Park as the interim connectivity will be made available through LILO arrangement.

Protection arrangement of 220 kV Dondaicha - Dhule S/C & Dondaicha - Amalner - Dhule S/C lines needs to be modified. Relay settings will be changed as per LILO arrangement at the receiving substation to cater the exact load requirement. Interim arrangement shall include the facilities for data communication for transfer of real time operational data such as voltage, frequency, real and reactive power flow, energy, status of circuit breaker & isolators position and other parameters to the State load dispatch center.

4.4.2 Final 400kV External Evacuation System for 500MW Solar Park

In view of large quantum of RE generation in the Sakri & Dondaicha area, MSETCL has already planned to develop the 220/400kV, 2x500 MVA GIS sub-station at Balsane in STU 5-year Transmission plan which will evacuate the said 500MW Solar Park & upcoming other projects in future. The said sub-station is proposed to be implemented under Green Energy Corridor part-II (Tranche-III) program of MNRE. The scope of work of 400kV pooling sub-station (STU) is as follows:

400kV Transmission System

1. 400/220kV Pooling Sub-Station at Balsane (2021-22)
2. 2x500 MVA, 400/220kV ICTs with GIS bays.
3. LILO of one circuit of 400 kV Dhule - Sardar Sarovar D/C line at 400kV Pooling S/s

**SPECIAL INSTRUCTIONS TO BIDDERS FOR
e-TENDERING AND REVERSE AUCTION**

GENERAL

The Special Instructions (for e-Tendering) supplement 'Instructions to Bidders', as given in these RfS Documents. Submission of Online Bids is mandatory for this RfS.

e-Tendering is a new methodology for conducting Public Procurement in a transparent and secured manner. Now, the Government of India has made e-Tendering mandatory. Suppliers/ Vendors will be the biggest beneficiaries of this new system of procurement. For conducting electronic tendering, *Solar Energy Corporation of India Limited (SECI)* has decided to use the portal <https://www.tcil-india-electronicstender.com> through TCIL, a Government of India Undertaking. This portal is based on the world's most 'secure' and 'user friendly' software from ElectronicTender®. A portal built using ElectronicTender's software is also referred to as ElectronicTender System® (ETS).

Benefits to Suppliers are outlined on the Home-page of the portal.

Registration of each organization is to be done by one of its senior persons who will be the main person coordinating for the e-tendering activities. In ETS terminology, this person will be referred to as the Super User (SU) of that organization. For further details, please visit the website/portal, and click on the 'Supplier Organization' link under 'Registration' (on the Home Page), and follow further instructions as given on the site. Some Bidding Related Information for this Tender (Sealed Bid)

The entire bid-submission would be online on ETS (unless specified for Offline Submissions). Broad outline of submissions are as follows:

- Submission of Bid-Parts
 - Envelope I (Technical-Bid)
 - Envelope II (Financial-Bid)
- Submission of digitally signed copy of Tender Documents/ Addendum

In addition to the above, the bidders are required to submit certain documents physically offline also as per Clause No. 24.a, Section-II, ITB of RfS Documents, failing which the technical bids will not be opened.

Note: The Bidder should also upload the scanned copies of all the above mentioned original documents as Bid-Annexures during Online Bid-Submission.

SPECIAL NOTE ON SECURITY AND TRANSPARENCY OF BIDS

Security related functionality has been rigorously implemented in ETS in a multidimensional manner. Starting with 'Acceptance of Registration by the Service Provider', provision for security has been made at various stages in ElectronicTender's software. Specifically, for Bid Submission, some security related aspects are outlined below:

As part of the ElectronicEncrypter™ functionality, the contents of both the 'ElectronicForms' and the 'Main-Bid' are securely encrypted using a Pass-Phrase created by the Bidder himself. Unlike a 'password', a Pass-Phrase can be a multi-word sentence with spaces between words (e.g. I love this World). A Pass-Phrase is easier to remember, and more difficult to break. It is mandatory that a separate Pass-Phrase be created for each Bid-Part. This method of bid-encryption does not have the security and data-integrity related vulnerabilities which are inherent in e-tendering systems which use Public-Key of the specified officer of a Buyer organization for bid-encryption. Bid-encryption in ETS is such that the Bids cannot be decrypted before the Public Online Tender Opening Event (TOE), even if there is connivance between the

concerned tender-opening officers of the Buyer organization and the personnel of e-tendering service provider.

CAUTION: All bidders must fill ElectronicForms™ for each bid-part sincerely and carefully, and avoid any discrepancy between information given in the ElectronicForms™ and the corresponding Main-Bid. For transparency, the information submitted by a bidder in the ElectronicForms® is made available to other bidders during the Online Public TOE. If it is found during the Online Public TOE that a bidder has not filled in the complete information in the ElectronicForms™, the TOE officer may make available for downloading the corresponding Main-Bid of that bidder at the risk of the bidder. **If variation is noted between the information contained in the ElectronicForms™ and the 'Main-Bid', the contents of the ElectronicForms™ shall prevail.**

In case of any discrepancy between the values mentioned in figures and in words, the value mentioned in words will prevail.

The bidder shall make sure that the Pass-Phrase to decrypt the relevant Bid-Part is submitted into the 'Time Locked Electronic Key Box (EKB)' after the deadline of Bid Submission, and before the commencement of the Online TOE of Technical Bid. The process of submission of this Pass-Phrase in the 'Time Locked Electronic Key Box' is done in a secure manner by first encrypting this Pass-Phrase with the designated keys provided by the SECI.

Additionally, the bidder shall make sure that the Pass-Phrase to decrypt the relevant Bid-Part is submitted to SECI in a sealed envelope before the start date and time of the Tender Opening Event (TOE).

There is an additional protection with SSL Encryption during transit from the client-end computer of a Supplier organization to the e-Tendering Server/ Portal.

OTHER INSTRUCTIONS

For further instructions, the vendor should visit the home-page of the portal <https://www.tcil-india-electronictender.com>, and go to the **User-Guidance Center**

The help information provided through 'ETS User-Guidance Center' is available in three categories – Users intending to Register/ First-Time Users, Logged-in users of Buyer organizations, and Logged-in users of Supplier organizations. Various links (including links for User Manuals) are provided under each of the three categories.

Important Note: It is strongly recommended that all authorized users of Supplier organizations should thoroughly peruse the information provided under the relevant links, and take appropriate action. This will prevent hiccups, and minimize teething problems during the use of ETS.

SEVEN CRITICAL DO'S AND DON'TS FOR BIDDERS

Specifically, for Supplier organizations, the following '**SEVEN KEY INSTRUCTIONS for BIDDERS**' must be assiduously adhered to:

1. Obtain individual Digital Signing Certificate (DSC or DC) of Class II or above well in advance of your tender submission deadline on ETS.
2. Register your organization on ETS well in advance of the important deadlines for your first tender on ETS viz 'Date and Time of Closure of Procurement of Tender Documents' and 'Last Date and Time of Receipt of Bids'. Please note that even after acceptance of your registration by the Service Provider, to respond to a tender you will also require time to complete activities related to your organization, such as creation of -- Marketing Authority (MA) [ie a department within the Supplier/ Bidder Organization responsible for responding to tenders], users for one or more such MAs, assigning roles to them, etc. It is mandatory to create at least one MA. This unique feature of creating an MA enhances security and accountability within the Supplier/ Bidder Organization.
3. Get your organization's concerned executives trained on ETS well in advance of your first tender submission deadline on ETS
4. For responding to any particular tender, the tender (ie its Tender Search Code or TSC) has to be assigned to an MA. Further, an 'Official Copy of Tender Documents' should be procured/ downloaded before the expiry of Date and Time of Closure of Procurement of Tender Documents. Note: Official copy of Tender Documents is distinct from downloading 'Free Copy of Tender Documents'. Official copy of Tender Documents is the equivalent of procuring physical copy of Tender Documents with official receipt in the paper-based manual tendering system.
5. Submit your bids well in advance of tender submission deadline on ETS (There could be last minute problems due to internet timeout, breakdown, et al)
6. It is the responsibility of each bidder to remember and securely store the Pass-Phrase for each Bid-Part submitted by that bidder. In the event of a bidder forgetting the Pass-Phrase before the expiry of deadline for Bid-Submission, facility is provided to the bidder to 'Annul Previous Submission' from the Bid-Submission Overview page and start afresh with new Pass-Phrase(s)
7. ETS will make your bid available for opening during the Online Public Tender Opening Event (TOE) 'ONLY IF' your 'Status pertaining Overall Bid-Submission' is 'Complete'. For your record, you can generate and save a copy of 'Final Submission Receipt'. This receipt can be generated from 'Bid-Submission Overview Page' only if the 'Status pertaining overall Bid-Submission' is 'Complete'.

1. Get your organization's concerned executives trained for e-ReverseAuction related processes on ETS well in advance of the start of e-ReverseAuction.
2. For responding to any particular e-ReverseAuction, the e-ReverseAuction (ie its Reverse Auction Search Code or RASC) has to be assigned to an MA.
3. It is important for each bidder to thoroughly read the 'rules and related criterion' for the e-ReverseAuction as defined by the Buyer organization.
4. It is important to digitally-sign your 'Final bid' after the end of e-ReverseAuction bidding event.
