

Selection of Solar Power Developers for Setting up of 10GW ISTS Connected Solar PV Power Plant linked with 3GW (Per Annum) Solar Manufacturing Plant under Global Competitive Bidding (Phase - I)

AGENDA POINTS TO BE DISCUSSED WITH STATE AUTHORITIES

S.NO	DISCUSSION POINTS	DESCRIPTIONS
1	Electricity for manufacturing to be provided at subsidized rate	With Integrated facility, contribution of power cost component shall have a significant impact on the price competitiveness of the Solar PV modules for domestic manufacturers. Therefore, provision of electricity to the manufacturing units at the tariff equivalent to the tariff quoted by winning bidder should be provided by the state wherein the manufacturing facility is set up.
2	Environmental Clearance and other pollution clearances at various levels	State should facilitate faster process to obtain Environmental Clearance and further should advocate at the central level to provide Environmental Clearance without any delay.
3	Single Window Clearance for all the state approvals	<i>Considering manufacturing from (Ingot to Modules) might be considered under “Orange” category of industries, selected bidders shall be accorded all regulatory approvals from central and state agency within 90 days from Letter of Award (LoA) by SECI.</i> Further, state should provide necessary facilities to implement single window clearance for obtaining all state related approvals.
4	Faster land allocation for implementation of power projects	Request state to provide faster allocation of land for implementation of the power projects. State should provide incentives such as, deemed conversion of land, concessional stamp duty with respect to transaction of land.
5	Special concession packages to be allowed.	State should provide special concessional items with respect to the manufacturing industry being set up within their jurisdiction.
6	Incentives	The State may provide any other incentives in order to attract the winning bidder for setting up of manufacturing plant in that particular State.
